Revision History of LED Bulb

Version	Change
1.00	Initial version.
1.01 -1.02	Fixed the issue that the white LED light flickers sometimes.
1.03	Added the function of using manual switch to select the color.
1.04	Fixed the issue that the PWM of LED cannot be completely turned off sometimes.
1.05	Fixed the issue that the Device Reset Locally CC listed after the Mark CC in the NIF. Fixed the issue that 2 different NIFs are sent out sometimes when switching the manual switch on-off continuously.
1.06 - 1.07	Updated the Z-Wave library. Added eeprom compatibility: supports the AT25PE20 eeprom.
